*Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 1-20, drawn to a shrink wrapping machine, classified in class 53, subclass 128.1.

Group II. Claim 21, drawn to a method of controlling a shrink wrapping machine, classified in class 53, subclass 422

2. Inventions of Group II and Group I are related as process and apparatus for its practice.

The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatuses of Group I, as claimed, are not limited to, nor does it disclose all of the functions or limitations as claimed in Group II. For example, the means for checking errors and executing commands based on the errors detected.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

3. A telephone call was made to Peter Gilster on July 31, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
